

Traffic lights

The Alapont traffic light is ideal for loading dock installations. Color lights indicate to the driver the possibility of maneuvering during unloading.

Characteristics

- ✓ **Led technology** allowing savings in operating and maintenance costs.
- ✓ Card with **two groups of LEDs** (red and green).
- ✓ It has two supports that allow the traffic light to be **oriented within a range of 200°** in fractions of 3°.
- ✓ The traffic light needs a control to change from red to green light.
